

PARTICOLARI PER LA PULIZIA DEGLI INIETTORI

SMALL PARTS FOR INJECTOR CLEANING

Elettroniettore visto in sezione

Injectors cross-section

Sostituire sempre:

- il filtrino che si intasa e limita il passaggio del carburante;
- gli O-ring di tenuta, sia superiori che inferiori per non avere perdite di benzina;
- i particolari in plastica che si deformano

Per pulire efficacemente il puntale ed il foro dell'iniettore togliere il pintle-cap e sostituirlo.

Replace always:

- *the filter, which becomes clogged and decreases the fuel flow;*
- *the O-ring seals, both top and bottom monted, to avoid fuel leakages;*
- *the plastic parts, which warp.*

To clean the injectort tip and orifice, remove and replace the pintle-cap
